

# Driver License Authentication

On the night of Thursday, Oct 27, an update will be loaded to the Go Wild system. It will consolidate the Customer Found and Personal Information screens. When searching for a customer, it will now skip the Customer Found screen...

**Customer Found**

Name	Customer Number	Date of Birth
CUSTOMER TEST	729-086-322	02/06/1975

DL Issuing State: Select  
DL ID: [Empty Field]

Cancel Next

... and immediately bring you to the Verify Customer-Personal information screen. It is here that you can now enter the customer's driver license state and number, and select the **Verify** button to authenticate the driver license for use in the field. If the driver license checks out with the Department of Transportation database, it will indicate that the customer may use their driver license in place of certain license documents.

**Note: Only Wisconsin driver licenses may be validated. State issued ID cards or expired driver licenses will not verify through this method. Those documents may not be used for hunt/fish licenses in the field.**

**Verify Customer - Personal Information**

Please ask the customer if the following information is correct.

**Personal Information**

Name	Customer Number	Date of Birth
CUSTOMER TEST	729-086-322	02/06/2000
