Residency

Residency Required

I have verified this customer's current identification and address information. I attest that this customer qualifies as a:

RESIDENT NON-RESIDENT

Identification Requirements to purchase a Resident License

Section 29.001(69) of the Wisconsin Statutes defines residency as:

"Resident" means a person who has maintained his or her place of permanent abode in this state for a period of 30 days immediately preceding his or her application for an approval. Domiciliary intent is required to establish that a person is maintaining his or her place of permanent abode in this state. Mere ownership of property is not sufficient to establish domiciliary intent. Evidence of domiciliary intent includes, without limitation, the location where the person votes, pays personal income taxes or obtains a driver's license.

Identification Requirements to purchase a Nonresident License

Nonresidents are required to provide identification showing the applicant's name and address prior to purchasing a license.

Failure to properly verify residency and request appropriate customer identification as required by your Agent Contract could result in termination of your authority to issue DNR licenses.

Cancel

Next

The customer must present proof of residency to you at every purchase. Driver license is best. A previously purchased fishing or hunting license is NOT proof of residency. Refer to the information on screen for residency requirements, or touch Next to continue
